Dear Harold:

Enclosed is the email message Dick Ehlke sent me regarding what he correctly observed was a somewhat curious item in the New York Times. The reference to Holland appears at the end of the article.

Also enclosed is a copy of DB Thomas's article in Science and Justice on the acoustics evidence. In my opinion, it is a very thorough and painstaking analysis. While some of the statistical calculations are beyond me, I feel I understand the basic points. Lardner's article understates the force and sweep of his analysis.

Enjoyed talking with you yesterday. Keep your spirits up.

Best regards,

Jim
